

Five Advantages of Health Savings Accounts

Your Health, Your Choice, Your Future

At Optima Health, we believe the key to long-term healthcare affordability and improved individual health is member involvement.

Your involvement must be supported by a health program, rather than mere benefits, and include easy-to-use tools, information, and financial incentives. By coupling High Deductible Health Plans (HDHP) with a Health Savings Account (HSA), you have more control over health expenses.

Optima Health has created such a solution with our Optima Equity and OptimaFIT® HSA health plans. This innovative arrangement offers you a way to reduce and control healthcare costs while allowing you to save money for qualified medical expenses when you actually need them.

You make all the decisions about your HSA. You can make choices that are best for you. And your unused health savings dollars will keep earning tax-free interest for you, in your HSA.

A Health Savings Account Offers Many Unique Advantages

1.

YOU SAVE ON PREMIUMS. You should be able to lower health insurance premiums by switching to health insurance coverage with a higher deductible. The money you save on premiums can be contributed toward your HSA, with pre-tax advantages. Then, use that money as needed to pay for qualified medical expenses now, or in the future.

2.

OWN YOUR HEALTHCARE DOLLARS RATHER THAN RENTING THEM. In a conventional health plan, the premium you pay makes care available to you. The money you spend annually on your premium is not returned to you if you do not seek healthcare. That's like renting. However, when you put money into an HSA, it's yours—growing with tax-free interest—and it stays yours, to use or not. It's like the equity you build when you pay for your house. You own the healthcare investment and it works for you.

3.

AN HSA PROVIDES TRIPLE TAX SAVINGS. You contribute to the HSA with tax-deductible dollars. The money you (or your employer, if applicable) put into your HSA earns tax-free interest and you can distribute funds for qualified medical expenses. If you don't need to withdraw funds for healthcare costs, the money continues to earn interest and grow—staying with you wherever you go. HSAs are never taxed at a federal income tax level when used appropriately for qualified medical expenses. Also, most states recognize HSA funds as tax-deductible with very few exceptions. Please consult a tax advisor for specific regulations.

4.

YOU ARE PROTECTED. Optima Equity and OptimaFIT HSA plans cover preventive care services whether or not you've met your deductible. You have a fixed limit on your out-of-pocket cost before your medical expenses are covered. That out-of-pocket amount is what your HSA can be used to cover.

5.

YOUR FUNDS GO WITH YOU. Because you own the money in your HSA, it goes with you even if you leave or change jobs. Once the money is in your account, it's yours.
